MaxForce

Built For The Way You Work

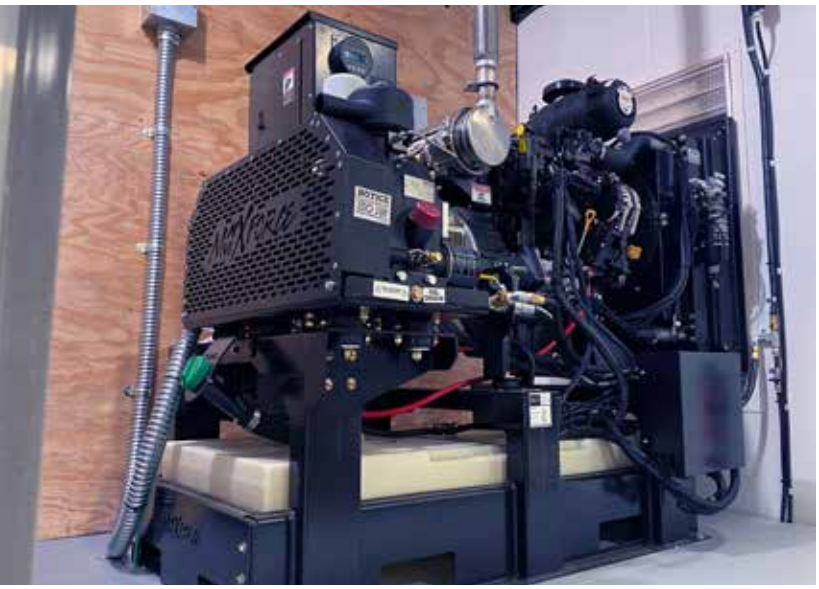
Your Premium Brand for Turn-Key Spray Equipment

Agitators • Generators • Coating Sprayers • Spray Foam Rigs

Built for the Way You Work

That is more than a tag line. It is the two core principles that created us:

1. **Provide turn-key solutions that we know work for the application you do.** Proven by testing and experience. Our customers don't have to figure things out or learn by the school of hard-knocks. MaxForce products come ready to work.
2. **MaxForce equipment is ready to work as hard as you do**. We do not take short cuts and use only the best components. Our designs focus on maximizing productivity and reducing down time. When you are ready to get to work, your equipment will be too.



Powerful Integration with MaxForce Generators

We have installed thousands of generators into trailer and truck mounted spray rigs. We got so sick of making generators work for mobile applications we decided to engineer our own solution. The MaxForce line of generators are built from the ground up to work in these demanding environments. Unique features such as integrated air compressors, poly undermount fuel tanks, remote fuel fill necks, high cooling radiators, and remote displays make it the perfect solution for your trailer or truck.

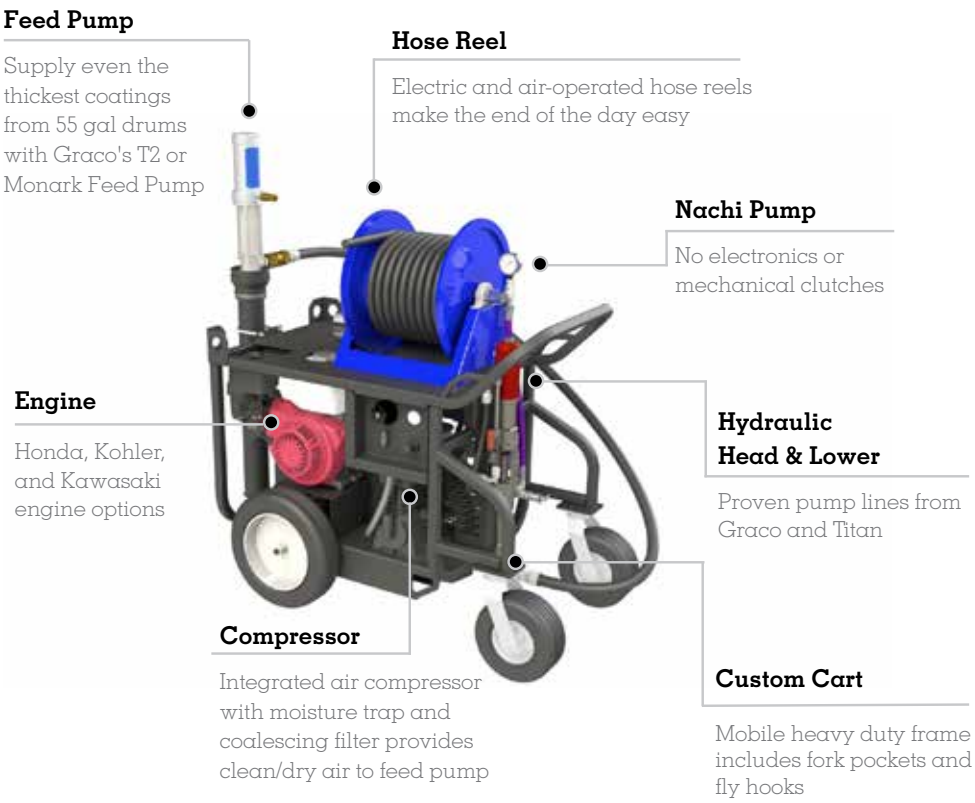
Mix it Up with the MaxForce e-Agitator

MaxForce e-Agitators are ideal for mobile spray applications. These 110V agitators are lightweight, quiet, and more efficient than air operated agitators. The Elite model will hold RPM as the material level goes down in the drum.

Coating Sprayers

Designed to spray thick architectural coatings

To spray thick coatings, feed pumps and heat are often required. This means large pump manufacturers do not have solutions that work out of the box. Contractors struggle to make things work. MaxForce spray equipment comes ready to work with feed pumps, integrated air compressors, and optional heat to thin cool material.



Fireproofing Equipment

Industry specific tools required to get the job done

Several equipment manufacturers build pumps for the fireproofing industry, but miss the ancillary tools required to get the job done, leaving contractors to create their own solutions. MaxForce has a full line of alum pumps, quick fill, timer boxes, and water booster pumps to get the job done.

Become a Distributor

Gain Access to the MaxForce Lineup

MaxForce is the new manufacturing brand of CJ Spray and is designed to be a distributed product through leading suppliers in the insulation and specialty coatings markets. MaxForce is a premium brand known for the highest quality, turn-key engineered solutions, and unmatched technical support. While CJ Spray will be the silent partner, our years of experience and know how will be on full display as MaxForce.
